1 Einleitung

Hallo OpenRheinRuhr! öääß

The above links use the generic `mirror.ctan.org` url which autoredirects to a CTAN mirror that should be reasonably nearby and reasonably up to date. However, perfect synchronization is not possible; if you have troubles following the links, your best bet is to choose explicitly from the list of CTAN mirrors (you'll need to append `systems/texlive/tlnet` to the top-level mirror urls given there to get to the TL area).

3 Fazit

Zusammenfassend konnte in dieser Arbeit gezeigt werden, dass es signifikante Unterschiede zwischen A und B gibt. Weitere Forschung wird genausowenig Resultate bringen.
